Angles	<p>Know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles.</p>	<ul style="list-style-type: none"> If one angle in a triangle is 38° and another is 68°, what type of angle will the third be? Tick all the obtuse angles 47° 107° 98° 90°  <ul style="list-style-type: none"> Which number is an angle? <input type="text" value="79.4"/> <input type="text" value="-60"/> <p>Explain why.</p>	<ul style="list-style-type: none"> Odd one out. <input type="text" value="180°"/> <input type="text" value="45°"/> <input type="text" value="79°"/> <input type="text" value="225°"/> <p>Explain why.</p> <ul style="list-style-type: none"> Cut out a circle with a spinner in the centre.  <p>Put the arrow in the starting position above. Turn over a flash card with an angle on. Estimate the given angle by moving the spinner. Check how close you are.</p>	<ul style="list-style-type: none"> Estimate and measure the angles in these shapes.  <p>Record your results in a table. Work out how close you were. Did you notice anything or find any easier?</p>

<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Angles</p>	<p>Draw given angles, and measure them in degrees ($^{\circ}$)</p>	<p style="text-align: center;">Complete practically</p> <ul style="list-style-type: none"> • Draw an obtuse angle that is a multiple of 5 and 3 <p>Can your partner check it?</p> <ul style="list-style-type: none"> • Draw an acute angle that has a factor of both 4 and 6 • What do the angles in a triangle add up to? 	<p style="text-align: center;">Complete practically</p> <ul style="list-style-type: none"> • Class 5 are given one angle in an isosceles. It is 50° <p>Carol says,</p> <div style="border: 2px solid purple; border-radius: 15px; padding: 10px; margin: 10px auto; width: fit-content;"> <p>The other angles are 65° because two angles are equal in an isosceles triangle.</p> </div> <p>Is she correct? Explain why.</p>	<p style="text-align: center;">Complete practically</p> <ul style="list-style-type: none"> • Draw a range of angles for a friend. Have them order them, before measuring, from smallest to largest and check to see if they were correct.

Angles

Identify: angles at a point and one whole turn (total 360°), angles at a point on a straight line and $\frac{1}{2}$ a turn (total 180°) other multiples of 90°

- Work out the missing angles.

- Gary says,

If I turn the letter M by 180° then it looks like the letter W

Do you agree? Prove it.

- Design a 'fun house' for children to play in. It should have 'wonky' walls, windows and doors. Label the angle types. e.g.

- How many right angles can you find?

- Investigate the amount of obtuse and acute angles there could be in a pentagon. How many different pentagons can you create? Record the information in a table to show different acute and obtuse angles.
- Create your own missing angles for a partner. Include information relating to quarter, half and full turns.
